Professional Experience

Lead and Developer   Feb 2021 – present
ChryzHub 🔗

I'm a lead and developer of an open-source community bent on building usable projects and resources for the public, especially web developers.

- Effective communications with both old and new members
- Worked on large opensource projects, reviewed and merged to production.
- Managing the community projects on GitHub
- Building and maintaining visual interfaces
- Hosting and managing all web applications

Contract Web Developer   Nov 2020 – Feb 2022
TeenWolf Token 🔗

At TeenWolf, I worked using HTML, CSS, Python(Django) and Heroku

- Building and maintaining frontend interfaces.
- Integrating third party applications for smooth backend flow for clients use
- Building and maintaining database systems
- Deploying websites

Contract Web Developer   Jun 2021 – Jan 2022
Solanascan

Developing at Opeaktech Inc the company behind Solanascan based on contract and terms agreement.

- Built website and nice user experience
- Held virtual meetups and remote terms of task and responsibility.
- Effective communication with the team
- Worked on a crypto telegram bot

Backend Intern   Aug 2021 – Oct 2021

HNG 🔗

- Worked under defined deadlines and timelines.
- Responsible to team leads and subteam leads(stack)
- Developed efficient and secured API endpoints
- Wrote test for endpoints created
- Wrote documentation for endpoints created
- Used linting tools to properly structure codes
- Collaborated with internal teams to convert feedback into meaningful and improved solutions.

Backend Intern   Mar 2021 – Aug 2021

Zuri-I4G 🔗

I spent six months in this internship programme building personal and collective projects.

- I was responsible to a Project Manager.
- Worked remotely using version control software and deploying using Heroku.
- I led a backend(Django) team in building a project.
- I learnt more about user experience, relative to backend flows for projects.
- Improved code reuse and performance by making effective use Object Oriented Programming (OOP)

Projects

ZuriChat 🔗

- Repository 🔗

Zuri Chat is a platform on which an infinite number of powerful collaboration apps can be built, the platform that will power remote work in the Web3 future.

Dev-Meet 🔗

- Source Code 🔗

A web application for developers with same interest or programming language create a chat room to meet, communicate and many more.

Technologies Used:
- HTML and CSS
- Postgres
- Heroku
- Python(Django)
- Django Rest Framework
